11 SEPTEMBER 2018

Let's create the world's best and most popular IPv6 certification program

When it comes to technologies that have had the greatest impact on human development, the Internet is at the top, in the same class as penicillin is for human health.

When it comes to the threats to the continued growth of the Internet, IP address shortage is at the top and IPv6 is the answer.

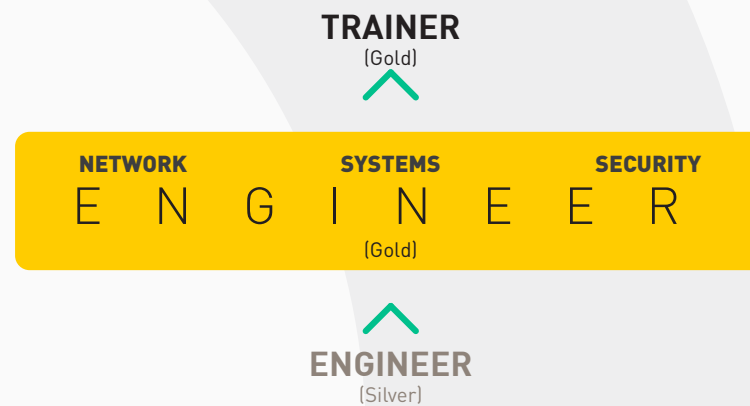

AFRINIC and certi:6 under the aegis of the IPv6 Forum is the answer to certifying the knowledge and skills that engineers will need to thrive in this new era.

There are two main delivery mechanisms for our IPv6 certification exams

1. Online test: Available only for SILVER level exams, unless there's no delivery partner in your city
2. In person with a certi:6 partner: Available for SILVER and GOLD levels.

CERTIFICATION TIERS

WHY PARTNER WITH US?

- Quality IPv6 certification provider (only 12 in the world)
- Exclusive partner for advanced IPv6 training
- Value-add to your conference/workshop
- Make IPv6 skills certification accessible to engineers in your country
- Raise funds to support your capacity building initiatives
- Only one in the world in French

DELIVERY PARTNERSHIPS HELP US

- Scale deliveries to lots of different cities while maintaining the integrity of the test
- Make the exams more accessible globally
- Deliver exams to engineers who might not be able to make online payments.

WHO CAN BECOME A DELIVERY PARTNER

If your organization's activities involve the aggregation of network engineers, then you might qualify to become a delivery partner. Prospective partners must have a functional website registered under their own domain as well as a staff to run and administer tests.

These could be but not limited to

- IT Training Academies
- Training Units of ccTLD Authorities
- IT Regulators
- Network Operator Groups (NOGs)
- IT event organizers
- Higher Educational Institutions

Yours must be an organization that can offer a distraction-free room (e.g. computer lab, dedicated testing room or classroom) for the purpose of testing

STEPS TO BECOMING A PARTNER

YOU

DESIRED VALUE

- IPv6 certification of engineers in partner's territory
- Accreditation as AFRINIC/certi::6 partner
- Deliver AFRINIC courses in partner's territory

OFFERED VALUE

- Access to network engineers in partner territory
- Local publicity & exposure for AFRINIC
- Local/regional certi::6 delivery partner

AFRINIC

- Physical certi::6 testing centre
- Local vendor of certi::6 exam vouchers
- Local administrators of certi::6 exams

- IPv6 capacity building skills transfer
- World-class IPv6 courseware
- International exposure for partner
